Project Development Phase
Model Performance Test

Date	15 October 2026
Team ID	SkillWallet — ServiceNow Project
Project Name	Automated Employee Onboarding & Offboarding System
Maximum Marks	

Model Performance Testing:

Adaptation: This project uses ServiceNow low-code automation instead of AI models. Metrics below measure the automation's "intelligence" — its ability to make correct routing decisions.

S.No.	Parameter	Values	Screenshot
1	Model Summary	Automation Engine: ServiceNow Flow Designer Flow Name: on or off Boarding Flow Total Actions: 15 Trigger: Service Catalog Decision Points: 2 (If Approved / Else If Rejected) Branches: 2 (approve, reject) Task Creation: 3 (IT, Facilities, Security)	[Flow Designer canvas]
2	Accuracy	Training Accuracy: N/A (not an ML model) Equivalent — Flow Accuracy: • Test Runs: 5 • Successful Runs: 5 • Accuracy = 100% Validation Accuracy: • End-to-end tests: 3 (REQ0010001, 0010002, 0010003) • Successful completions: 3 • Validation Accuracy = 100%	[Execution Details screenshot]
3	Fine Tuning Result (if done)	Fine Tuning: Yes — 3 iterations Iteration 1: Initial flow (broken — Submitted Request field empty) Iteration 2: Fixed Submitted Request → 90% functional Iteration 3: Fixed Email recipient + added rejection branch Final Validation Accuracy: 100% Final Flow Runtime: 1,347 ms Final Status: Production-ready	[Final flow version screenshot]

Additional AI-Adjacent Metrics

Metric	Value	Note
Decision Accuracy (Approval Path)	100%	Approval correctly routes to manager
Task Routing Accuracy	100%	3 tasks correctly assigned to 3 groups
Status Update Accuracy	100%	Lifecycle Status updates correctly
Email Routing Accuracy	100%	Emails reach Requested For user

Metric	Value	Note
Data Mapping Accuracy	100%	All 5 mapped variables populate correctly

Summary

Aspect	Value
Automation Engine	ServiceNow Flow Designer
Total Flow Actions	15
Decision Points	2
Training Iterations	3
Final Accuracy	100%
Runtime	1.35 sec
Custom Scripts	0
Status	✓ Production-ready
