Project Development Phase
Model Performance Test

Date	15 October 2026
Team ID	SkillWallet — ServiceNow Project
Project Name	Automated Employee Onboarding & Offboarding System
Maximum Marks	

Model Performance Testing:

Note: This project uses ServiceNow Flow Designer instead of Salesforce automation. The equivalents are mapped below.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	ServiceNow Automation Setup: Flow Designer Workflow - Trigger: Service Catalog - Actions: 15 - Objects/Tables used: u_employee_lifecycle, sc_req_item, sc_task, sysapproval_approver. Note: Records are created via Get Catalog Variables and Create Record actions.	(Insert Flow Designer screenshot)
2.	Accuracy	Training Accuracy - 100% (5 successful test runs) Validation Accuracy - 100% (End-to-end testing with REQ0010002) Import/Data mapping status: All 5 selected catalog variables imported correctly into the custom table without errors.	(Insert Execution Details screenshot)
3.	Confidence Score	Routing Logic Confidence: 100% - If Approval State is "Approved" → 3 tasks created. - If Approval State is "Rejected" → Lifecycle record set to Rejected. The workflow engine is 100% confident in task assignment because it uses a deterministic lookup based on the "Assignment Group" field.	(Insert Rejected Branch screenshot)
