Ideation Phase

Define the Problem Statements

Date	15 October 2026
Team ID	SkillWallet — ServiceNow Project
Project Name	Automated Employee Onboarding & Offboarding System
Maximum Marks	2 Marks

Customer Problem Statement Template

Create a problem statement to understand your customer's point of view. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face.

Problem Statement 1 (HR Manager)

Element	Description
I am	An HR Manager at a growing organization, managing 50+ new hire onboardings per quarter, working across multiple teams (HR, IT, Facilities, Security)
I'm trying to	Onboard and offboard employees quickly and consistently, ensuring every department completes their tasks on time without me chasing them
But	Coordination is done manually via email and spreadsheets — causing delays, missed tasks, and no visibility into who has completed what
Because	There is no unified system to trigger, track, and route onboarding/offboarding tasks across departments — everything runs on tribal knowledge
Which makes me feel	Frustrated and overwhelmed — every onboarding feels like a fire drill, and new hires have a poor first-day experience

Problem Statement 2 (IT Fulfiller)

Element	Description
I am	An IT Administrator responsible for provisioning accounts, email, hardware, and software access for new hires
I'm trying to	Set up new employees completely on day one — accounts, email, laptop, software — without missing anything
But	I receive onboarding requests through email, chat, and hallway conversations with no standard format — often missing critical details like department, manager, or software needs
Because	There is no structured intake form, no automatic task assignment, and no way to see what other departments (Facilities, Security) are doing in parallel
Which makes me feel	Annoyed and undervalued — I'm blamed for delays that are caused by incomplete information, not my work

Summary Table

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	HR Manager	Onboard/offboard employees quickly and consistently	Coordination is manual and inconsistent	No unified system to route and track tasks	Frustrated and overwhelmed
PS-2	IT Administrator	Set up new employees completely on day one	Requests arrive informally with missing details	No structured intake form or automatic routing	Annoyed and undervalued

Root Cause Identified

> **The core problem is the absence of a unified, automated intake-to-fulfillment system that captures structured request data, routes approvals, assigns departmental tasks, and provides real-time visibility to every stakeholder — HR, Managers, IT, Facilities, and Security.**

Solution Alignment

Problem	Solution
Manual coordination	Flow Designer automates approvals and task creation
Missing data	Catalog item enforces mandatory fields (Employee ID, Department, Manager, Joining Date)
No visibility	Employee Lifecycle table tracks status in real time
Delayed tasks	Tasks auto-assigned to IT/Facilities/Security on approval
No standard format	Single Service Portal form for all onboarding/offboarding
Poor experience	Onboarding complete in hours, not days

Outcome

This problem statement exercise confirmed that the pain is **not only in one department** — it's a systemic issue across HR, IT, Facilities, and Security. The ServiceNow solution solves all of them through a single automated workflow with role-based task routing.
