Maximum Marks	4 Marks

Empathy Map Canvas — HR Manager (Primary User)

An empathy map captures knowledge about a user's behaviours and attitudes. This map focuses on the **HR Manager** who initiates and owns the onboarding/offboarding process.

WHAT DOES SHE HEAR?
- "The new hire starts Monday — are we ready?"
- "IT hasn't set up the laptop yet"
- Boss: "Why did it take so long?"
- "Facilities needs the badge photo"
- Team: "Who owns this task?"

WHAT DOES SHE THINK & FEEL?
- "Why is onboarding still so manual?"
- "I'm chasing too many people"
- "There must be a better way"
- "I hope nothing is forgotten"
- "This isn't scalable as we grow"

WHAT DOES SHE SEE?
- New hires waiting on day one with no laptop
- Endless email threads between departments
- Spreadsheets tracking incomplete onboardings
- Frustrated new hires
- IT, Facilities, Security working in silos
- No single dashboard for status

WHAT DOES SHE SAY & DO?
- Sends emails to IT, Facilities, Security manually
- Uses spreadsheets to track onboarding status
- Follows up multiple times: "Is it done yet?"
- Apologises to new hires for delays
- Escalates to managers when tasks are missed
- Copies/pastes the same info into 4 different systems
- Onboards one employee at a time — no parallel processing

Full Empathy Map (Detailed)

THINK & FEEL

What really counts	Major preoccupations	Worries & aspirations
Smooth onboarding for every new hire	Whether every department completed their part	Wants to look competent to leadership
Consistency across all onboardings	Missing something critical (laptop, badge, access)	Hopes to scale without hiring more HR staff
New hire experience on day 1	Tracking who has done what	Aspires to focus on strategic HR work — not chasing tasks

HEAR

From friends	From boss	From influencers (HR community)
“My company's onboarding was so smooth”	“Why did the last hire wait 3 days for a laptop?”	“Have you tried ServiceNow for HR workflows?”
“New hires always complain about delays”	“We need this fixed before Q4 hiring”	“Automate everything you can”
“HR is always drowning in admin work”	“Can you reduce onboarding time?”	“Self-service portals are the future”

SEE

Environment	Friends	Market offers
Emails flying between HR/IT/Facilities/Security	Other HR managers using manual processes	ServiceNow, Workday, BambooHR — all offering onboarding automation
New hires waiting on day one	Peers burned out from admin work	Slick onboarding portals at competitor companies
Multiple spreadsheets and checklists	Frustrated teammates	Industry articles on onboarding ROI
No single source of truth	—	—

SAY & DO

Attitude in public	Appearance	Behaviour toward others
“I'll get it done — but it's painful”	Professional, calm — but stressed inside	Apologetic to new hires for delays
“We need a better system”	Proactive problem-solver	Firm with departments when tasks slip
“I don't want to chase people”	Organised but overwhelmed	Diplomatic across teams

Pain & Gain Analysis

PAIN — Fears, Frustrations, Obstacles

Pain Point	Impact
Manual coordination across 4 departments	Delays, errors, frustration
No single form for requests	Missing data (manager, department, joining date)
Chasing approvals over email	Wasted time, missed follow-ups
No real-time status visibility	Can't answer “Where are we?”
Inconsistent onboarding experiences	Poor new hire first impression
Cannot scale with company growth	Bottleneck on HR team
No audit trail	Compliance risk

GAIN — Wants, Needs, Measures of Success

Gain	How It's Measured
Faster onboarding	Time from request to day-1 ready
Single unified process	One form → one workflow → all tasks
Zero missed tasks	100% task completion rate
Real-time visibility	Dashboard showing each request's stage
Better new hire experience	New hire satisfaction score on day 1
Scalable solution	Onboard 10× more employees without more staff
Complete audit trail	Every approval, task, and closure logged
Focus on strategic work	Time saved from chasing tasks

How ServiceNow Solution Addresses Pain → Gain

Pain	Gain with ServiceNow
Manual coordination	Flow Designer automates task routing
Missing data	Mandatory fields on catalog item
Chasing approvals	Dynamic manager approval via email link
No visibility	Lifecycle table with Status field
Inconsistent experience	Single standard catalog item
Cannot scale	Automated workflow handles unlimited volume
No audit trail	Flow execution logs + approval history

Outcome: The empathy map identifies the HR Manager's operational pain points and desired gains. The ServiceNow solution aligns with these needs through structured intake, automated routing and approvals, status visibility, and an auditable workflow.
