Project Name	Automated Employee Onboarding & Offboarding System	**Maximum Marks**	2 Marks

Problem–Solution Fit Canvas

Problem-solution fit checks whether a solution addresses a real customer problem and fits the customer's existing behavior, channels, constraints, and workflow.

1. CUSTOMER SEGMENT(S) — CS HR Managers at growing organizations managing 50+ hires per quarter, working with IT, Facilities, and Security teams.	**2. CUSTOMER CONSTRAINTS — CC** Limited HR staff; no dedicated developer; enterprise HR software budget constraints; audit-trail compliance needs; must use existing ServiceNow.
3. AVAILABLE SOLUTIONS — AS Manual emails/spreadsheets; BambooHR or Workday; Trello or Asana; ServiceNow HR Service Delivery add-on; custom scripts.	**4. JOBS-TO-BE-DONE / PROBLEMS — JBP** Consistent, fast onboarding; automated approvals; departmental task assignment; real-time tracking; audit trails; fewer first-day delays.
5. PROBLEM ROOT CAUSE — RC No unified HR/IT/Facilities/Security system; scattered information; manual assignment; low visibility; unstructured intake.	**6. BEHAVIOUR — BE** 4–8 emails per onboarding, Excel tracking, 2–3 follow-ups per hire, escalations for delays; estimated 6–8 hours wasted per hire.
7. TRIGGERS — TR Leadership approves a hire; start date is confirmed; hiring paperwork is submitted; employee resignation triggers offboarding.	**8. YOUR SOLUTION — SL** ServiceNow Service Portal form with 13 variables; automatic manager approval; three departmental tasks; lifecycle status table; role-based ACLs; notifications.
9. CHANNELS OF BEHAVIOUR — CH ServiceNow Service Portal (/sp); email notifications; ServiceNow agent UI; ServiceNow Reports.	**10. EMOTIONS: BEFORE / AFTER — EM** Before: frustrated, overwhelmed, anxious, apologetic, stressed. After: confident, assured, proud of day-one readiness, proactive, in control.
11. ONLINE — OL ServiceNow documentation/community; SkillWallet project workspace; GitHub documentation repository; demo video and stakeholder screenshots.	

Emotions: Before / After

Before	After
Frustrated, overwhelmed	Confident, in control
Anxious about missing tasks	Assured nothing is missed
Apologetic to new hires	Proud of day-one readiness
Stressed by escalations	Proactive with visibility
Fire-drill feeling	Repeatable, scalable process

Fit Summary

Area	Problem	Solution Fits Because…
Coordination	Manual emails across four teams	Flow Designer automates routing
Data Quality	Incomplete requests	Mandatory catalog fields
Visibility	No status tracking	Lifecycle table and status field
Speed	Days to complete	Automated flow intended to complete in hours
Compliance	No audit trail	Approval history and flow logs
Scale	Cannot handle growth	Cloud platform scalability
Cost	Enterprise HR software is expensive	Built on existing ServiceNow platform

Fit Validation

Question	Answer
Does the solution solve a real problem?	Yes — manual coordination is a known industry pain.
Is the customer actively experiencing it?	Yes — with every onboarding.
Is the solution accessible to them?	Yes — through the existing Service Portal.
Does it fit their workflow?	Yes — same teams and tasks, now automated.
Is it cost-effective?	Yes — assuming existing platform entitlements cover the solution.
Can it scale with them?	Yes — cloud-based, auto-scaling architecture as described in the project.

VERDICT: STRONG PROBLEM–SOLUTION FIT ✓

Outcome

The exercise indicates that the Automated Employee Onboarding & Offboarding System addresses the HR Manager’s core pain—manual coordination—while fitting existing workflows and using the current ServiceNow platform. Expected benefits include reduced follow-up time, fewer missed tasks, clearer status visibility, and a stronger audit trail. The supplied project description states that the solution has been built, tested, and verified end-to-end with real catalog submissions.

Note: Performance and outcome statements reflect the supplied project content; actual results depend on deployment configuration and operational validation.
